

Australian Lock Company is the major distributor of Salto intelligent electronic access control locking systems throughout Australia.

The Salto system provides security, flexibility and control all in real time.

Salto's XS4 platform offers a Wireless & WiFi networked door control solution suitable for residential & commercial applications which responds to today's challenges by offering a system that works more cleverly for you to provide a safer, more secure environment.

Supporting the most advanced contactless smart card technology and integrating its unique cost effective & energy efficient WiFi solution, Salto provides you with the tools to control who can access doors – resulting in peace of mind and a higher level of security for everyone.

Salto invests heavily in Research & Design the result of which is the continued introduction of exciting new products.

The Salto GEO Cylinder is a wire free fully stand alone electronic access control solution. It is versatile, cost effective, compact in size & fully integrated with the XS4 platform.

The Salto XS4 Locker Lock is the 'next generation' in providing electronic high security for lockers & cabinets.

Salto AElement is a new RFID hotel lock that provides an enhanced guest experience using on-line wireless technology.

Australian Lock Company & Salto provides clients with the opportunity to look beyond the ordinary.
